

The *seed.ab.ca* New Varieties List is your heads up to what will soon be available in a field near you.

Some varieties may only be available in limited supply, so make sure you call your local representative for more information. The companies that were asked to supply information are responsible for any claims contained within the list. Always remember that variety performance may vary from region to region.

abbreviations

PEST RESISTANCE:

R - Resistant
MR - Moderately Resistant
MS - Moderately Susceptible
S - Susceptible

TRAITS:

Bt - ECB Resistant
HXI - Herculex I
YGCB - YieldGard Corn Borer
CL - Clearfield Production System
GENRR2Y-Genuity RR2 Yield

GT - Glyphosate Tolerant
LL - Liberty Link
RR - Roundup Ready
RR2 - Roundup Ready 2
RW - Corn Rootworm Control
VT2P - Genuity VT Double Pro
VT3 - YieldGard VT Triple
PESTS:
CB - Corn Borer
ECB - European Corn Borer
FHB - Fusarium Head Blight
PRR - Phytophthora Root Rot
SCN - Soybean Cyst Nematode

OTHER:

HU - Heat Units
OP - Open Pollinated
PCVT - Prairie Canola Variety Trial
SSZ - Short Season Zone
MSZ - Mid Season Zone
LSZ - Long Season Zone
WHEAT:
CWAD - Canada Western Amber Durum
CWRS - Canada Western Red Spring
CWGP - Canada Western General Purpose

Hate wheat midge? Hate spraying?

You'll love this.

Grow a new midge tolerant wheat variety and protect your yields and grade. Midge tolerant wheat is grown with an interspersed refuge system – a varietal blend of susceptible wheat and tolerant wheat that prevents a build up of resistant midge. Maintaining this varietal blend by limiting the use of farm-saved seed is a simple step to prevent an estimated \$36 per acre loss from midge damage, and preserve this new technology. What's not to love about that?

Contact your retailer today for information on these new varieties and to understand your responsibilities under the Midge Tolerant Wheat Stewardship Agreement.

Or visit www.midgetolerantwheat.ca to learn more.

SOME SEEDS GET PREFERENTIAL TREATMENT

PROSPER FX. THE PROTECTION THEY DESERVE.

The best seeds deserve the best seed treatment. Year after year, over half of the canola acres in Canada are protected with Prosper® FX.

Prosper FX provides unmatched control of flea beetles and seed- and soil-borne diseases like rhizoctonia and fusarium. Make sure your seed is treated with the respect it deserves – you’ve earned it.

For more information visit BayerCropScience.ca/ProsperFX.

BayerCropScience.ca or 1 888-283-6847 or contact your Bayer CropScience representative.

Always read and follow label directions. Prosper® is a registered trademark of Bayer. Bayer CropScience is a member of CropLife Canada.
